

第五话：对抗大地

Ch.5 Fighting the Earth

静

Silence

Sorry... it's already
that late... but I still
ask you to...

Ah.

Oh-

stay...to work
overtime...

Not at all, principal...
it's my job as the
secretary

Speaking of which, tomorrow
at the opening convocation,
how's the registration going?

T/N: Intentional or not, the gesture of the two panels got swapped, i.e. 'Yes' is supposed to hold the brush with the gesture in the right panel and the barbell with the see in the left

Hey hey...

Who are you...

calling idiots?

You heard me!

I'm talking
about you.

How dare you say
that! I'm throwing
you over!

Grab the opponent's wrist
and cut in! Then throw your
opponent out with the help
of lever principle. This is
the legendary—

Over the
Shoulder!

Oh no! The opponent used 'Gravity'!

Angel Slayer! What happened?

Let me give you a simple example...

conscious

fainted

With the weight fixed, which person is harder to carry up, a conscious one or fainted one? The answer is clearly the latter... then why?

It's because a conscious person's body is tight, of which all the parts are connected. Thus it is easier to 'pick up'.

However when the body is relaxed, the weight is dismantled into pieces, so it's difficult to find a fulcrum! Entrusting yourself to 'gravity' make you feel heavier without actually adding any weight!

Just like a big cube and a pile of chains, even if they weigh the same, it's more difficult to pick up the latter!

The reason why he could stand in such a weird pose without falling...

is that he can utilise 'Gravity' to the maximum!

As Liu the Angel Slayer said that is exactly the situation Wang the Devil Executioner is currently facing now!

The opponent tightens all the muscles but relaxes all joints and ligaments

Now for Wang the Devil Executioner, he feels like...

carrying a tank
on his back!

However, that's not even the most terrifying thing!
然而,最恐怖的不仅仅是如此!

中秋节快乐!

页数太少，看的不过瘾对不对？

可是固硬好累啊……

一起来给作者动力吧！
